HLT 724 Linear Position Transducer

The sensor's measuring principle for determination of position or distance is based on magnetic-inductive measurement.

Based on this non-contact and wear-free measuring system, HYDAC offers a version in a pressure-resistant housing for full integration in hydraulic cylinders.

The different output signals (analogue) enable connection to all HYDAC ELECTRONIC GmbH measurement and control devices as well as connection to standard evaluation systems (e.g. to PLC controls).
